eem Foreword

The need for product information for research, design and production has been greatly accelerated by the growth of the electronics industry.

With engineering and procurement time at a premium, the publisher has drawn upon the experience of hundreds of engineers in the field to develop a unique product information system. It incorporates three major elements: **eem**—Electronic Engineers Master, annual catalog and directory; **eem CLIP/FILE,** monthly new product newspaper; and the industry's first uniform filing system.

eem serves as a bound catalog file wherein the complete product data of many hundreds of manufacturers is contained in 51 easy-to-use product sections. This catalog data is supplemented by an industry-wide Product Index and Directory plus a Manufacturers Directory which places over 5000 manufacturers and their local sales offices only a phone call away.

CLIP/FILE provides monthly new product data, thus keeping **eem** perpetually up-to-date between annual editions.

The File System, incorporating **eem's** 51 product sections, fulfills the engineers' needs for an easy-to-use filing system. (Refer to inside back cover for file system details.)

That the **eem** system meets the requirements of today's product information needs is attested to by these comments of a few of **eem's** 56,000 users:

"...We have wished many times that **eem** had been published two years sooner, as it would have saved us many hours of labor and a great deal of money."
Baird-Atomic, Inc.

"**eem** certainly has a wealth of information which is easy to locate and simple to keep up-to-date via the **CLIP/FILE** technique. I have already set up my own file...the Manufacturers' Directory with Sales Offices is especially appreciated.
Associated Missile Products Co. Div. of American Machine and Foundry Co.

"I've been using **eem** since the day I received it, and have reorganized my catalog file to tie in with the **eem** system...My colleagues have discovered the **eem** system and are using it for themselves.
Farrand Optical Co., Inc.

"Because of the comprehensive approach to the cataloging problem in the electronic field, as exemplified by the **eem** system, I have recommended scrapping our catalog system and utilization of the **eem**."
AVCO Manufacturing Corp.

NOTE: Prices are furnished for information only—they are not offered as quotations. Participating manufacturers reserve the right to make mechanical changes in specifications, revise prices, or discontinue items without notice.

Every precaution is taken to insure the accuracy of the catalog display pages and directories, but the publishers cannot be held responsible or guarantee against the possibility of error or omission.

The publishers encourage recommendations and corrections to make **eem** most helpful to the industry.

CIRCULATION POLICY

eem and **CLIP/FILE** are distributed to engineers and purchasing agents of U.S. and Canadian manufacturing companies, research laboratories, industrial consultants and government agencies. To qualify for a complimentary copy, a recipient must be actively engaged in the specification, design or procurement of electronic components, equipment or services. The following information should be sent to the publisher on a company letterhead: individual's name and title (job function); chief products manufactured by the company or division. Correspondence should include building number or mail station and must be signed personally. Group qualifications are not acceptable. The cost to non-qualified personnel—$10.00 per copy, plus postage.

ELECTRONIC ENGINEERS MASTER

The combined Index-Directory starting on the following page contains 2,788 product headings listed in alphabetical sequence along with their respective page numbers. Under each heading manufacturers are listed alphabetically. Those manufacturers with product information in the Catalog Section (white pages) are shown in **bold face** type with page numbers. Where a bold face listing appears without a page number, the product is not cataloged in this edition. This eliminates time-consuming reference to pages that do not contain the product information you are seeking.

To locate the nearest sales office of any listed manufacturer, refer to the Manufacturers' Directory (yellow section).
